

ActionCall

Managed audio conferencing for all your meeting needs!

Participants can call ACT from anywhere in the world and are greeted by a Conference Coordinator who connects them to their scheduled conference call. The Conference Coordinator stands by throughout the call to assist you and to answer questions that may arise. You may reach a Conference Coordinator at any time during your conference by dialing *0.

ActionCall offers a variety of access options to suit your business objectives:

Local Meet Me - Each participant dials a pre-assigned number and is immediately connected to the conference call. This service allows participants to join the conference from any phone anywhere around the world utilizing their own long distance provider.

Toll-Free Meet Me - Participants dial a pre-assigned toll-free number to access the conference. This service allows all bridge charges and long distance charges to be billed to a single party, and participants can call from anywhere in the U.S. and Canada.

Dial Out - Each participant is called at a pre-specified number by an ACT Conference Coordinator and is then connected immediately to the conference. This service saves valuable time and lends a personal touch to executive meetings, interviews, and legal conferences. This service is ideally suited for participants who will be in a designated location at the time of the conference call and would like the convenience of an operator notifying them at the precise time the call begins.

How can ActionCall help me?

- Enables more frequent and effective communication
- Increase the flow of information to team members
- Cut the time needed to make a decision
- Remove the stress and hassle of travel from your day
- Make the most effective use of budgets by cutting travel costs

Increase Speed — Control Costs — Save Time — Maximize Productivity
