

ActionView

Bridging for all your videoconferencing needs!

ActionView Videoconferencing Bridging Services allow participants to bridge into a conference from anywhere in the world. ACT's bridging capabilities span the globe regardless of networks, video endpoint manufacturer, or location. ActionView Videoconferencing provides multipoint bridging services where ACT will connect all sites prior to meeting start time to ensure efficient and reliable videoconferences. Customer video endpoints are pre-registered to ensure bridge compatibility, thereby enhancing conference performance. ACT's Customer Support is available pre-conference and post-conference by dialing a support number to one of our Global Video Service Delivery Centers. Both ACT's point to point and multipoint bridging services are supported by our highly skilled Conference Support Engineers.

How can ActionView Bridging Services help me?

- Improve communications between you, your customers, and co-workers with the ability to read reactions and emotions
- Build trust and respect with face-to-face meetings
- Cost savings by means of reducing travel and related expenses while eliminating non-productive travel time
- Improve quality of life by minimizing your need to travel
- Build teams by sharing goals, expectations, and commitment to a cause
- Stay informed with technical staff reviews

Use ActionView Bridging Services for all your important meetings:

- Project Management
- Product Development
- Job Interviews
- Customer Briefings
- Product Announcements
- Training Courses and Seminars

Increase Speed — Control Costs — Save Time — Maximize Productivity
